

AFEDA : International Ragweed Day

On the 3th of June at Saint-Priest (the suburb of Lyon, France) a drone expert, the farmer owner, a Bayer agricultural engineer, AFEDA members went in maize (corn) fields and made photographs with a camera **and with a drone**.

The “drone” results will be presented at the AFEDA General Assembly on the 23rd of September in LYON.

On the left, the fields were treated, on the right the fields were without treatment.
